

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

British East Africa, collected during the Roosevelt African Expedition. L. J.

Two New Species of Birds from the Slopes of Mount Pirri, Eastern Panama. By E. W. Nelson. From Smithsonian Miscellaneous Collections, Volume 60, Number 21.

*Capito maculicoronatus pirrensis*, Mount Pirri Barbet; and *Pseudotriccus pelzelni berlepschi*, Berlepsch Flycatcher. L. J.

Western Wild Life Call. Published by the California Associated Societies for the Conservation of Wild Life. February 7, 1913.

A publication of this sort, illustrating by pictures of what is now happening to our wild life, and showing what the results in the past have been when such practices have gone on unchecked, scattered over the country at large and put into the hands of sportsmen as well as others, would, in our opinion, be of the greatest service in the warfare now on to protect and conserve our wild life. We trust that the impetus which this movement in the Golden State is certain to give to the conservation of Wild Life will reach eastward across the mountains and become evident the country over. L. J.

#### THE BIRD MAGAZINES.

The Auk. Vol. XXX, January, 1913, No. 1. Cambridge, Mass.

The present number contains 165 pages, of which 105 are concerned with longer articles and an account of the Thirtieth Stated Meeting of the American Ornithologists Union. Four of the ten articles are based on field studies, two are concerned with the technical aspects of the study, one is biographical, one controversial, and one deals with photography. Of the twenty-six titles under the caption, "General Notes," twenty-one record extralimited occurrences of species. The other departments are treated in the usual thorough manner. L. J.

Bird-Lore. Vol. XV, No. 1, January-February, 1915. Harrisburg, Pa.

The three colored plates in this number illustrate the Snow Bunting from the brush of Louis Agassiz Fuertes, and the Hudsonian Curlew and the Ruffed Grouse by Bruce Horsfall, these under the department of the Audubon Societies. This number, according to the custom, is the Christmas Bird Census number. There are 199 lists from 187 localities. The lists come from the Atlantic to the Pacific, and from Ontario to Florida. The largest list was made by

Dawson and Brooks at Santa Barbara, California. They can beat Northern Ohio in the winter, but fall behind in May. L. J.

The Condor. Vol. XV, January-February, 1913, No. 1.

It is rarely that we are treated to such a feast of Shore Birds as we find in the first article by W. Leon Dawson, "A Glimpse of Surf-birds." The five reproductions of photographs approach perfection both from the standpoint of the photographer and the engraver. "Concealing and Revealing Coloration of Animals," by Junius Henderson, adds valuable points to this current controversy. In "Swallows and Bedbugs" Edward R. Warren shows that the swallows are not guilty of harboring the species which harrasses humans, but that it does harbor an allied species. Two articles follow relating to local distribution. In the final article Joseph Grinnell discusses at length "The Outlook for Conserving the Band-tailed Pigeon as a Game Bird of California." Interesting field notes close the number to the editorial page. L. J.
